Hunting on Land Bank Properties

The land bank welcomes hunters. Approximately two-thirds of the land bank's acreage is open to hunting of some sort; the remainder is not suited to hunting because of the size or shape or location of the various properties. All hunters must have a land bank hunting permit. Please consult the land bank website if you wish to hunt on land bank land.

Properties with hunting activity are open to the general public during the hunting seasons, with the exception of deer week. Hunting is allowed from Monday through Saturday during deer week.

Please telephone the land bank office (508-627-7141) for additional details or if you have any questions.

Private Property: Public conservation land is only successful to the extent that visitors are respectful of the properties and their natural resources, but also of their neighborhoods in which they are located. Please do not trespass on private properties at any time.

Extraction and Collection on Land Bank Properties: No plants, animals, minerals or artifacts shall be extracted or collected except with land bank permission; see website for details.
